Experience

Lattice

Sr. Staff Product Designer, Core UI

June 2025 - Present

GitHub

Led key platform efforts across GitHub's core UI, including:

- The initial redesign of GitHub's global navigation, command palette, and the core product's responsive overhaul
- Partnered cross-functionally to design and ship components used by millions of developers
- Built and launched a new documentation experience for GitHub's design system—consolidating fragmented resources and re-platforming our tech to better align with the business
- Facilitated design processes to align teams on shared patterns and drive consistency.

Staff Designer, Design Systems

May 2022 - June 2025

Staff Design Manager, Design Systems

November 2021 - April 2022

Staff Designer, Design Systems

February 2020 - December 2021

Senior Designer, Design Systems

October 2019 - February 2020

Designer, Design Systems

September 2018 - September 2019

Trello

Led a research and discovery initiative to enhance the Trello board and project experience.

Collaborated cross-functionally to align with business priorities, while contributing to and identifying new components to add to the design system.

Product Designer

April 2018 - September 2018

BuzzFeed

Shipped the redesign of the BuzzFeed and BuzzFeed News homepage and created a design system that unified the BuzzFeed digital suite and enabled product teams to ship at scale. Shipped an overhaul of the content management tooling that enabled journalists and editors to publish work.
